The Pioneers In Linux Training

make learning an experience @ amrita

About Amrita Technologies

Amrita the pioneers, authorized training and certification partners for RedHat Linux / JBOSS, the in demand technologies since 2002. We provide End to End Solutions in Linux System Administration, Security, Virtualization, Clustering & Storage, Data Centre, Architect, Cloud Computing, Middleware Courses. The information technology is evolving rapidly. At Amrita we are always looking for an edge that will make our students competitive and successful.

Award winner of "The Best Redhat Certified Training Partner for Commitment, Collaboration & Consistency in Quality Training & Support"

JBoss Application Administration I (JB248)

Install, configure, and manage JBoss Enterprise Application Platform

JBoss® Application Administration I teaches you the best practices for installing and configuring Red Hat® JBoss Enterprise Application Platform 6. Through hands-on labs, learn the essential, real-world tasks that a system administrator needs to know to effectively deploy and manage applications on JBoss Enterprise Application Platform. After completing this course, you should be prepared to take the Red Hat Certified JBoss Administration (RHCJA) Exam.

Note: JB248 replaces our popular JB336 course and is meant for system administrators. The topics in this course cover all of the exam objectives of the RHCJA exam.

Course content summary:

- ; Install and run JBoss Enterprise Application Platform 6 in standalone mode and domain mode
- ; Configure a domain
- ; Deploy applications to JBoss Enterprise Application Platform 6
- ; Configure the datasource subsystem
- ; Configure Java™ Message Service (JMS) and HornetQ

- ; Configure the logging subsystem
- ; Configure the web subsystem
- ; Implement application security in JBoss Enterprise Application Platform 6
- ; Migrate JBoss Enterprise Application Platform 5 applications to JBoss Enterprise Application Platform 6
- ; Get an introduction to clustering.

JBoss Application Administration II (JB348)

Manage large-scale deployments of JBoss Enterprise Application Platform 6

JBoss® Application Administration II (JB348) prepares experienced system administrators to provision and manage Red Hat JBoss Enterprise Application Platform 6 in large-scale production environments. Learn about clustering, performance tuning, and securing enterprise application platform instances, as well as troubleshooting and applying fixes. This course is the follow-on course for JBoss Application Administration I (JB248).

Course content summary:

- ; Install JBoss Enterprise Application Platform 6 and optional components.
- ; Learn about clustering with an emphasis on tuning.
- ; Deploy to production and cloud environments.
- ; Script with CLI.
- ; Monitor and manage resources for Enterprise Application Platform.
- ; Manage, cluster, and tune a HornetQ messaging system.
- ; Configure security settings that include authentication, authorization, networking, and the management interfaces.

Red Hat's award winning certifications include:

Red Hat Certified System Administrator (RHCSA)
 Red Hat Certified Engineer (RHCE)
 Red Hat Certified Virtualization Administrator (RHCV)
 Red Hat Certified Security Specialist (RHCSS)
 Red Hat Certified Datacenter Specialist (RHCD)
 Red Hat Certified Architect (RHCA)
 Red Hat Certified JBOSS Administrator (RHCJA)
 Red Hat Certified JBOSS Developer (RHCJD)
