The Pioneers In Linux Training

make learning an experience @ amrita

About Amrita Technologies

Amrita the pioneers, authorized training and certification partners for RedHat Linux / JBOSS, the in demand technologies since 2002. We provide End to End Solutions in Linux System Administration, Security, Virtualization, Clustering & Storage, Data Centre, Architect, Cloud Computing, Middleware Courses. The information technology is evolving rapidly. At Amrita we are always looking for an edge that will make our students competitive and successful.

Award winner of "The Best Redhat Certified Training Partner for Commitment, Collaboration & Consistency in Quality Training & Support"

Red Hat JBoss Enterprise Application Development I (JB225)

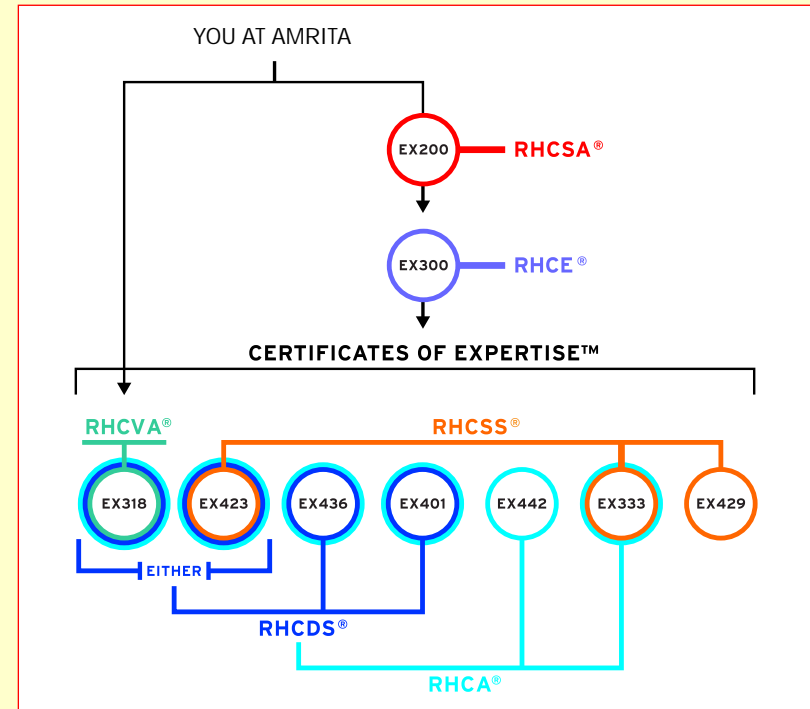

Create, test, and maintain Java EE-compliant applications from start to finish. Intended for mid-level Java™ developers, JBoss® Enterprise Application Development (JB225) introduces you to Java EE 6 frameworks, specifications, and application programming interfaces (APIs).

Create, test, maintain Java EE-compliant applications. Learn how to create, test, and maintain Java EE-compliant applications from start to finish using the Eclipse-based Red Hat® JBoss Developer Studio.

Create a fully functional enterprise Java application. Comprehensive lectures and extensive use-case, hands-on labs introduce you to enterprise application development using Red Hat JBoss Enterprise Application Platform 6, Contexts and Dependency I, Arquillian, JBoss Hibernate®, RESTEasy, HornetQ, and other related technologies to create a fully functional enterprise Java application.

Build a complete, multitier enterprise application. Learn how to build a complete, multitier enterprise application featuring a JavaServer Faces (JSF) 2 web-based front end, a Java API for Restful Web Services (JAX-RS) layer, an Enterprise JavaBeans (EJB) layer, and a Java Persistence API (JPA) persistence layer, leveraging best-practice design, coding, and testing techniques.

- ; Build robust enterprise applications using JBoss middleware.
- ; Build secure enterprise applications.
- ; Integrate applications with back-end enterprise information and messaging systems.
- ; Test with Arquillian.
- ; Use Contexts and Dependency Injection (CDI) for seamless multitier applications.
- ; Understand administration tasks for developers.
- ; Leverage JBoss Developer Studio tools.

Certifications

- RHCSA** Red Hat Certified System Administrator
- RHCE** Red Hat Certified Engineer
- RHCVA** Red Hat Certified Virtualization Administrator
- RHCSS** Red Hat Certified Security Specialist
- RHCDS** Red Hat Certified Datacenter Specialist
- RHCA** Red Hat Certified Architect

Expertise exams

- EX318** Enterprise Virtualization
- EX333** Enterprise Security: Network Services
- EX401** Deployment and System Management
- EX423** Directory Services and Authentication
- EX429** SELinux Policy Administration
- EX436** Clustering and Storage Management
- EX442** Enterprise Performance Tuning
